

Many dinosaurs lived in hot places like jungles. But some lived in cold places, too.

DINOSAURS IN THE DARK

They could see the trees to find food. And they could see their enemies and stay safe. They could stay warm in the cold, too.

APRIL 2008

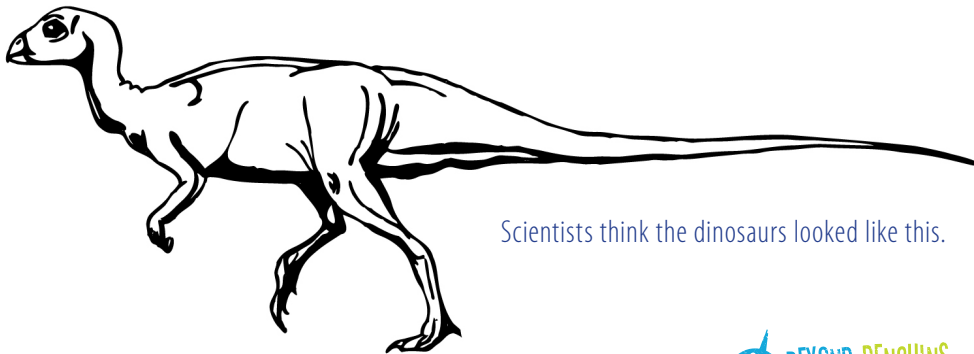

DINOSAURS IN THE DARK

This is how the dinosaurs lived in the cold and dark places. Where else might dinosaurs have lived?

DINOSAURS IN THE DARK

The sun did not shine at all during the winter. How could dinosaurs live in these cold and dark places?

Scientists think the dinosaurs looked like this.

Have you ever heard of a dinosaur?
They are animals that lived a long time ago.

DINOSAURS IN THE DARK

DINOSAURS IN THE DARK

We have found dinosaur bones in these places. We know that they had B-I-G eyes. Their big eyes helped them see in the dark.

This skull shows their big eyes!
