Rocks!

All        Rocks are everywhere.

Rocks are...
 in my yard,
on the playground,
in the parks,
in rivers and lakes,

All        Rocks can be different.

Different sizes
 Big rocks
   like mountains
   like boulders

Little rocks
   like pebbles
   like sand

All        Rocks are everywhere.

Some are shiny and smooth.
 Some are striped.
 Some are rough and jagged
 Some are fossils.

All        Rocks cover the earth.

On land
 And in the water
 In cold places
 And in warm places

All        Rocks are everywhere.
